

Kitting & Fulfillment

Streamline Your Supply Chain. Deliver with Precision.

Kitting is the process of assembling multiple components into a single, ready-to-ship package. As part of a full fulfillment solution, this ensures your products are packaged, managed, and delivered efficiently from start to finish.

Whether you're shipping product bundles, subscription boxes, or complex assemblies, Lancaster Packaging provides custom, scalable solutions tailored to your business.

Our Capabilities

- Custom kit assembly (simple to complex configurations)
- Inventory management & component tracking
- Pack-out and final packaging
- Order fulfillment & distribution
- Warehousing & storage integration
- Custom packaging design options

How it Works

1. Inventory Management

We organize and track all components to ensure accuracy and efficiency.

2. Kit Assembly

Products are assembled to your exact specifications by our experienced team.

3. Pack-Out & Preparation

Kits are securely packaged and prepared for shipment.

4. Order Fulfillment

We ship directly to your customers or distribution centers—accurately and on time.

Key Benefits

Reduce Costs

- Minimize packaging waste, labor, and shipping expenses.

Improve Accuracy

- Pre-assembled kits reduce errors and ensure consistency.

Save Time

- Streamline operations and accelerate order processing.

Optimize Storage

- Consolidated kits simplify inventory and warehouse space.

Why Lancaster Packaging

- Flexible & Scalable Solutions - From small runs to large-scale programs
- Customized to Your Needs - Built around your product and workflow
- Fast & Reliable Turnaround - Designed for speed and consistency
- Dedicated Support - A partner focused on your operational success

We support a wide range of industries with reliable, efficient, and scalable kitting solutions.
